Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This office action is responsive to communications filed on 07/21/2007

Claims 1, and 5-6 are pending and have been examined.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The instant claim recites the limitation "a transmission medium", examiner believes that applicant is referring to the "transmission medium" recited in claim 1. For the purpose of examination, examiner treats it as "the transmission medium".

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2145

5. Claims **1, 5-6** are rejected under 35 U.S.C 102 (e) as being anticipated by **Meyer (Patent No.: US 6,882,334 B1)**.

With respect to **claim 1**, Meyer teaches a communication apparatus connected to a network including a plurality of transmission media (Meyer: figures 1-2), comprising:

a detecting unit configured to detect whether or not a connection between said communication apparatus and a communication partner in the network includes a transmission medium other than a predetermined transmission medium (Meyer: fig. 4, col. 3, lines 7-47, and col. 6, lines 30-52. Noted the detection of RF or IR communication. It is noted that there's no requirement to what is a transmission medium. Therefore, one of RF or IR is the transmission medium and other is the predetermined transmission medium.); and

a control unit configured to control said communication apparatus to notify predetermined information to a user if said detecting unit detects that the connection between said communication apparatus and the communication partner includes a transmission medium other than the predetermined transmission medium (Meyer: col. 4, lines 1-29 and col. 6, lines 5-52, It is noted that the system alerts the user when there's interruption in the network connection with RF or IR transmission medium. This implies that the system detects which transmission medium is in use.).

With respect to **claim 5**, Meyer teaches a communication apparatus according to claim 1, wherein the predetermined transmission medium is a

transmission medium directly connected between said communication apparatus and the network (Meyer: col. 4, lines 47-48.).

With respect to **claim 6**, Meyer teaches a communication apparatus according to claim 1, wherein said detecting unit detects that the connection between said communication apparatus and the communication partner includes the transmission medium other than the predetermined transmission medium (Meyer: fig. 4, col. 3, lines 7-47, and col. 6, lines 30-52) if data cannot be received from the communication partner even though the communication partner is requested to transmit the data (Meyer: col. 3, lines 47-67 and col. 4, lines 11-29. It is noted that the detection occurs whether or not data cannot be received.).

Response to Arguments

6. Applicant's arguments with respect to claims 1, 5-6 have been considered but are moot in view of the new ground(s) of rejection.
7. In response to applicant's argument stated on Remarks, page 8, paragraph 2. See the explanation on Claim 1 above.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is

Art Unit: 2145

filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
